

Whoever started this must be a fat ass republican! aka:KKK

It's a great industry and there's lots of people who make their living with telemarketing!!!

If some people get aggravated with calls, either use a caller ID or tell marketers straight out you don't want to be bother. Now, in this event, many investors will make tons of money out of people like you and me...don't you see?, they're already advertizing their new products!!!! check it out!

On the other hand: we are being controled and our rights are taking away slowly and noone is doing a damn thing about it!!
